Curriculum Designed To Make You Industry Ready

Beginner

11.5 Months

Intermediate

11.5 Months

Advanced

9.5 Months

Core Modules

(With Specialisation in AI)

Programming Language Fundamentals 2 Months

Master Java basics, control structures, OOP, arrays, and memory management.

Data Structures and Algorithms 4.5 Months

Learn complexity, recursion, searching, sorting, and pattern-matching techniques.

Intermediate Problem Solving 1 Month

Build foundational problem-solving skills with arrays, strings, and basic algorithms.

Advanced DSA 1 Month

Tackle complex topics like tries, advanced DP, and graph algorithms.

SQL 1 Month

Understand relational databases, CRUD, joins, indexing, and transactions.

Backend 4 Months

Design robust server-side applications with Java, SOLID principles, and APIs.

Fullstack 4 Months

Build responsive applications using HTML, CSS, JS, React, Redux, and deployment workflows.

High Level Design 1.5 Months

Design distributed, scalable systems using caching, CAP theorem, and microservices.

Data Engineering 2 Months

Build data pipelines, work with big data tools, and perform advanced analytics.

Product Management for Engineers 1 Month

Learn product thinking, analytics, and roadmap planning for tech projects.

Low Level Design and Project

(Choose only 1)

Electives

(Optional, pick 1 or more)

<> Gen AI for Software Engineers 2 Month

Apply LLMs, RAG, and AI agents to create production-ready AI solutions.

<> Masters in Software Engineering 18 Months

Comprehensive track covering core CS, ML, data engineering, and chosen specialisation.

Add-On Programs

(Optional, pick 1 or more)

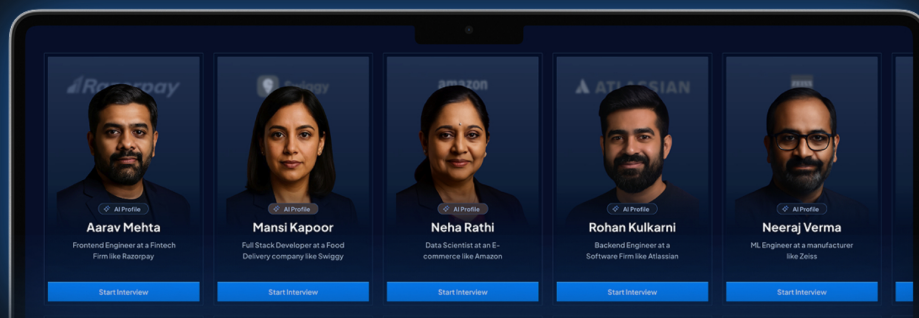

Dive in deeper on the topics covered

SCALER REVIEWS

Hear from our Alumni

Shiva Kant Mishra

Backend Engineer @Trackler

A new journey starts with Xpressbees. This could not have been possible without my family's support and huge Shout out to Scaler Academy Scaler for wonderful curriculum and support throughout . An almost impossible task became so easy with the help of you guys

Sarabjeet Singh

Lead SDE @Razorpay

Being an SD1 with high aspirations of being an SD2 soon, I started putting in even more effort by taking online classes at Scaler. the real-world problem-solving, system design insights, and hands-on approach were exactly what I needed to take my career to the next level

Rajmani Patel

Senior SDE @Microsoft

As someone who has willingly gone back to learning after 8 years of working in the tech field, I can attest to the truth of these words. It was this decision to hone my skills with Scaler that readied me for Microsoft

Prakash Indrasing Patil

Software Engineer @Capgemini

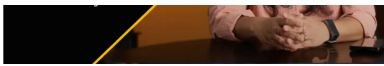

Scaler Academy has been the guiding light in this journey. The comprehensive curriculum, expert instructors, and the supportive community have played a pivotal role in shaping my coding prowess.

Jegan

Senior SDE @Nextiva

The real-world problem-solving, system design insights, and hands-on approach at Scaler were exactly what I needed to take my career to the next level.

THE FUTURE

Importance of Upskilling now

"The world needs 1 billion software developers and AI makes them more productive"

CEO, Microsoft

Tech leaders agree AI amplifies developers, not replaces them. **Satya Nadella** envisions needing billions more developers as AI boosts productivity. **Thomas Dohmke** sees companies hiring more engineers because AI multiplies capabilities. **Sundar Pichai** believes AI helps tackle bigger challenges, while **Andrej Karpathy** views it as unlocking new creative opportunities.
